SUMMARY

Backend Software Engineer with 4+ years building and modernizing large-scale integration and data platforms. Deep expertise in Python, API architecture, and legacy-to-modern migrations, with a track record of consolidating fragmented systems into unified, maintainable frameworks. Currently building an enterprise Customer Master Data Management platform; previously architected OTA integration systems serving 85+ global travel partners.

EXPERIENCE

Software Engineer — Customer Master (MDM) — Verdantis

Apr 2026 – Present | Mumbai, India

- Building a Customer Master Data Management platform for ESAG Group, currently in active development, covering data standardization, validation, and entity-resolution workflows for enterprise customer records.
- Implementing Python-based data quality and governance rules to support accurate, deduplicated customer master records across source systems.
- Collaborating with the platform team to define data models and integration logic as the project moves toward its first production release.

Senior Software Engineer — OTA Integration — STAAH (An Access Group Company, UK)

Sept 2021 – Sept 2025 | Surat, India

- Spearheaded the migration of 90+ OTA integration scripts from Perl to Python, reducing technical debt by 35%.
- Architected a unified Python-based ARI Push system consolidating 85+ legacy scripts, cutting partner onboarding time by 80%.
- Designed a flag-based modular framework supporting 85+ global OTA partners, enabling rapid configuration with minimal code changes.
- Built a proactive failure-alerting system with 30-minute health checks, improving incident response and operational transparency.
- Owned end-to-end architecture and rollout of the OTA reservation-flow migration from Perl to Python; built reusable modules for MySQL, Redis, SQS, and DynamoDB, accelerating delivery by 25%.
- Led code reviews and mentored 5+ junior engineers on backend architecture and best practices.

TECHNICAL SKILLS

Languages & Frameworks: Python, Perl, FastAPI, Flask, Django, Microservices, Object-Oriented Design

APIs & Integration: REST APIs, Webhooks, OTA integration protocols, Postman, Swagger/OpenAPI, JSON, XML

Data Engineering: Data quality, entity resolution, data standardization, data governance, ETL pipelines

Databases & Caching: MySQL, PostgreSQL, SQLite, Redis, Amazon DynamoDB

Messaging & Distributed Systems: Amazon SQS, event-driven architecture, asynchronous processing

Cloud & DevOps: AWS (EC2, S3, DynamoDB, SQS), Docker, Git, Linux, CRON, Shell scripting

Monitoring & Reliability: Proactive alerting systems, incident response, system health checks, logging

Practices & Tools: Agile/Scrum, code review, unit testing, technical documentation, VS Code, Jira

AI-Assisted Development: Claude, ChatGPT, GitHub Copilot, Cursor, Devin, Antigravity, Windsurf

Leadership: Architectural roadmaps, code reviews, mentoring (5+ engineers)

EDUCATION

B.E., Computer Engineering — Gujarat Technological University, CGPA 8.42 (2021)

ACHIEVEMENTS

- Published research: Raval R., Patel J., Patel H. — "Face Mask, Social Distance and Body Temperature Detector," International Journal of Computer Applications, Vol. 184, No. 13, 2022. [View publication](#)
- Recognized for leading critical Perl-to-Python API migrations at STAAH. [View recognition](#)
